

Relevant skills

Mircea MICLEA

1. Relevance is age-dependent

Cognitive skills (3 – 7 years old)

- **executive functions**
- **school prerequisites**

1. Relevance is age-dependent

Cognitive skills (15 – 64 years old)

- **working memory**
- **cognitive inhibition**
- **reasoning**
- **numeracy**
- **literacy**
- **information-processing speed**

1. Relevance is age-dependent

Socio-emotional skills (3 – 7 years old)

- **social (interaction, rule-compliance, prosocial skills)**
- **emotional (emotion expression, emotion production, self-regulation)**

1. Relevance is age-dependent

Socio-emotional skills (15 – 64 years old)

- **personality traits (Big Five model)**
- **self-regulation**

2. Cognitive skills become knowledge-dependent

Expertise = {

- large knowledge base
- specific heuristics
- metacognition

a sectorial development

3. Skills improvement is possible, but it should be:

- developmental**
- sectorial**
- continous**
