Implementing Bologna –  
On the way to a European success story?

# Workshop 4: Improving CO-operation and EMployability in the health care sector

## CONSENSUS

- Updating in international education inevitable for **CO** and **EM**
- 2. Prerequisites of sustainable internationalisation implementations:
  - research on current state of the arts and future demands, challenges, developments, epidemiology, demographic and otherwise caused health impairment tendencies
  - research based (new) curricular developments
  - research based health economy and integrated health care service export
  - transcultural sensibility and acceptance

- 
3. Basis for maintaining (international) **CO** and **EM**
- global positioning plan
  - individual KSA (knowledge, skill and attitude acquisition) updating (WFME global standards)
  - win-win scenarios and orientation alongside with overarching international concepts (WHO 1977, Ottawa Declaration 1986 and follow ups, UN MDGs, Setting/Context analyses and responses, European and national Health development plans)

## **Maintaining international CO and EM (ctd.)**

- competence identification with employers**
  - competence building in education (up to LLL)**
  - competence outcome monitoring**
  - Alumni feed back for educational programs**
  - Alumni career monitoring**
  - degree recognition across Europe**
  - CO between different health professionals**
  - modular co-education in favor of above**
- 4. Suprapersonal innovation monitoring as orientation for international CO and living standard improvements / maintenance**
  - 5. Euregio concepts and cross border CO**
  - 6. Qualification no EC employment guarantee**
