Minor exposure to cyber-attack case of Albania

On July 15th Albania suffered a massive cyber-attack. All government services were closed for more than 2 weeks.

We maintain EHEA website outside of any related government servers, but had some minor effects as the following:

- Few resources were affected temporarily, for example the recording of a small part of a meeting that was completed in that week (working on the recovery).
- IT expert workload is overwhelmed
- Email correspondence with the host Ministry was affected, lost, or suspended for some weeks
