

Breakout sessions on recognition and artificial intelligence

3rd TPG B on LRC meeting // online, 29 January 2026

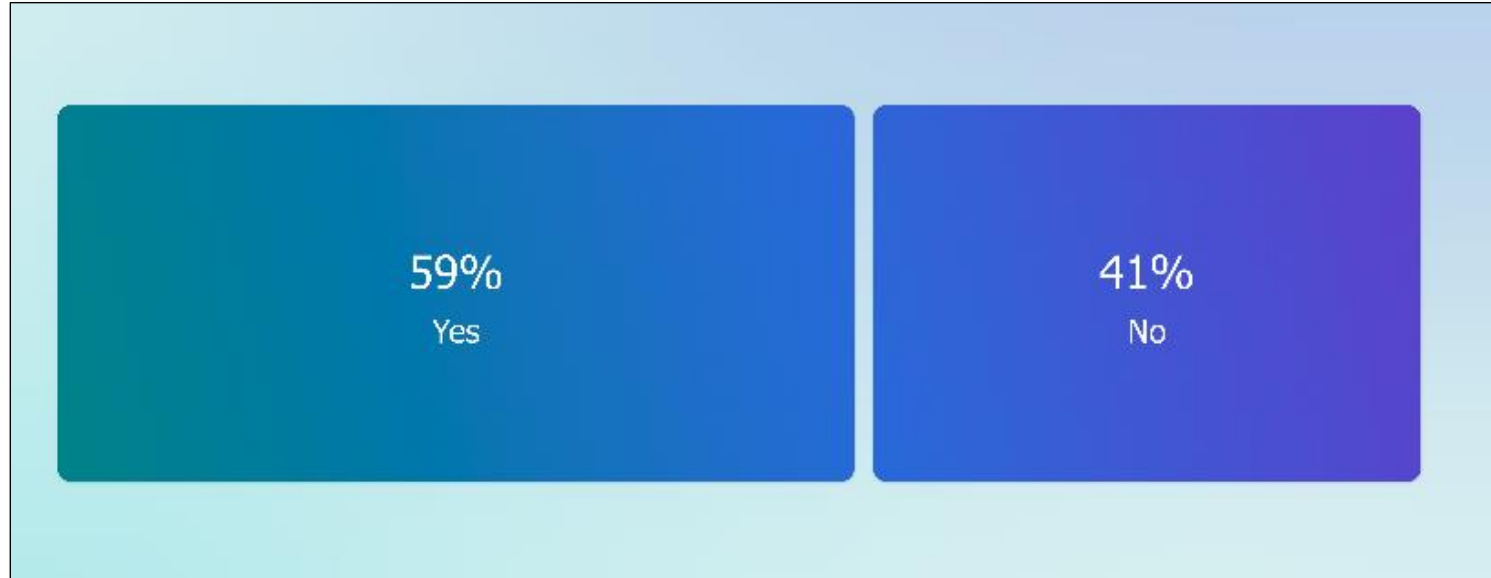

Chiara Finocchietti, CIMEA

Co-funded by
the European Union

Survey on recognition and artificial intelligence

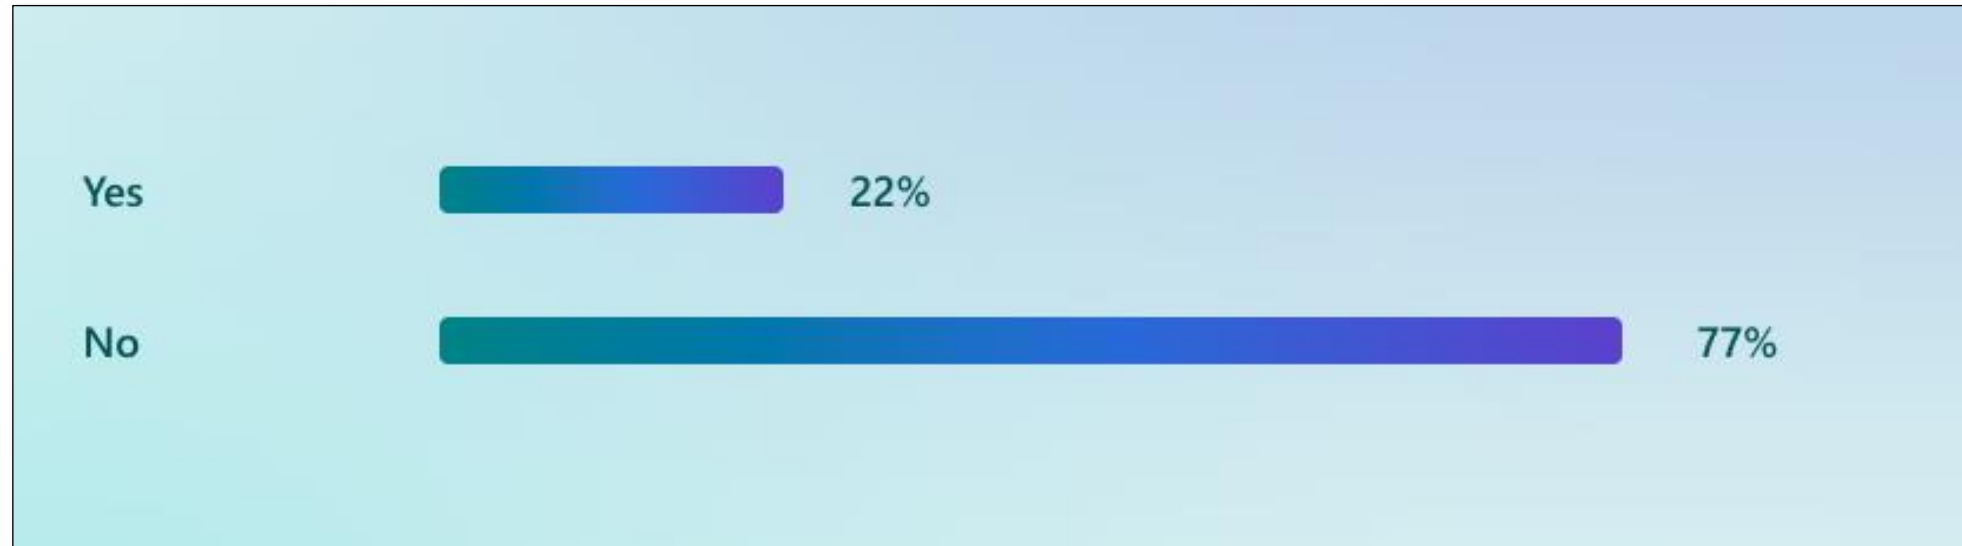

- Are there any ongoing reflections on whether to apply artificial intelligence to support recognition at national level?

- Specific Digital Units has been established at the centres level
- Tools to support automatic recognition of qualifications are already tested in different national HEIs
- Related publications are circulating at the national level
- Participation on international networks and working groups focused on promoting the use of AI technologies
- Use of chatbots for external communication.

Survey on recognition and artificial intelligence

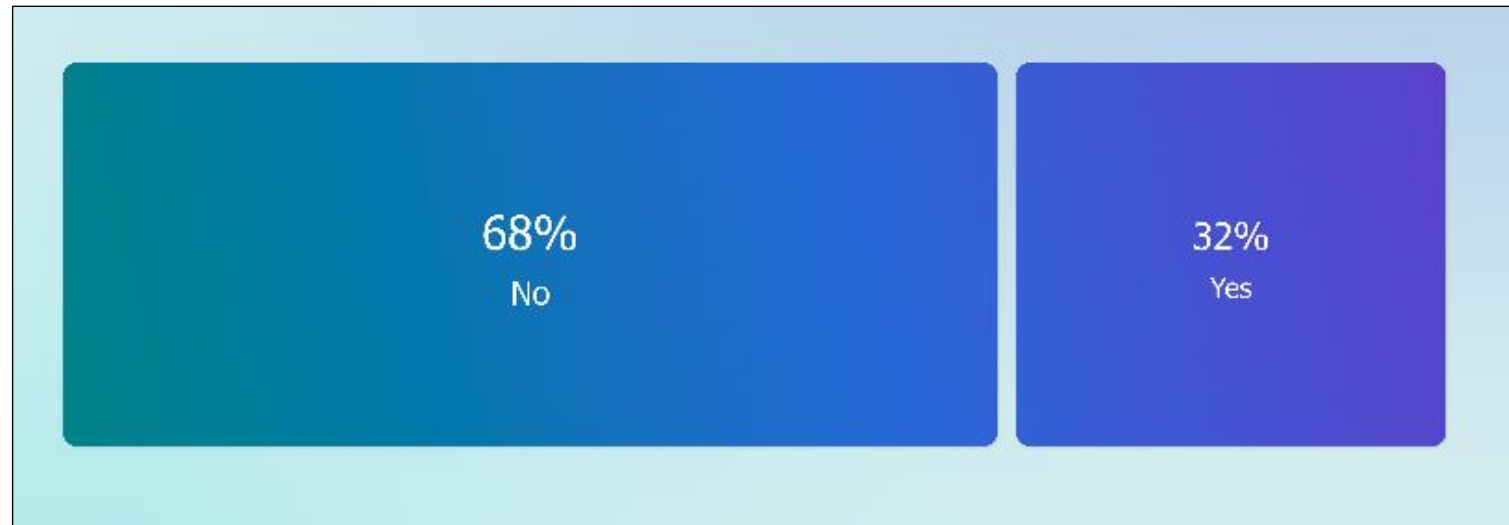

- Are you studying or working on specific legislation on the use of AI in higher education at national level?

- Adoption of a national Artificial Intelligence Strategy
- Diverse regulatory framework (EU, CoE, UNESCO, national legislation)
- Adoption of a national guide regulating the higher education sector.

Survey on recognition and artificial intelligence

- ❑ Is artificial intelligence applied to support recognition procedures at national level?

- The application of AI is not regulated at the national level, but it is applied at institutional level
- AI tools are just use for information gathering, backed by official sources
- Specific training sessions are organised for credential evaluators from national HEIs, including a focus on the digital transformation processes
- Participation to international projects, aimed at exploring the potential application of AI tools on the verification phase of the qualification recognition process.

Thank you!
